

me.green Newsletter#2

From 11th to 15th October will be held in Palermo the Training Course that will involve more than 20 young people and 4 coaches, coming from Italy, Cyprus, Turkey and Belgium, to share the best practices identified and selected by the Communities of Practices, established in each partner country as part of the "me.green" project.

The Community of Practices of People Help the People will share an experience of sustainable building, that is the construction of a house made of natural and biological materials, recycled with zero impact with the surrounding environment and the projects made by the High Language School "Ninni Cassarà" of Palermo.

CIEP Partner Group focused on a set of good practices, designed by a school, and affecting everyone's daily life. APNED partner community gave voice to schools which worked on the culture of recycling and natural production. The young people of the partner HUB Nicosia have been attracted by social enterprises that work according to the principles of circular economy and recycling, as well as Inclusion.

During the Training Course, participants will have the opportunity to meet and compare other young Europeans and new good practices, which will be replicated in their countries of origin, thus triggering a process of replicability bottom up.

"me.green" project, funded by the Erasmus + KA2 - Cooperation for innovation and the exchange of good practices, aims to develop a culture of change and sustainability among young people, creating the backdrop for effective climate change, environmental education for behavioral change and a better adaptation to a changing world.

The partnership consists of:

People Help the People (Italy) - Coordinator

Afyonkarahisar İl Milli Eğitim Müdürlüğü (Turkey)

The Hub Nicosia Ltd (Cyprus)

CIEP asbl (Belgium)
